

## PTFE-COATED STANDARD

# CLF916

**CLF916** is part of the Versiv family of flexible, non-porous laminated composites that combines the features of multi-layer fluoropolymer cast films with the mechanical properties of fibreglass-reinforced fabrics. It provides high mechanical strength, dimensional stability as well as excellent release properties and increased wear and abrasion performance due to a harder wearing surface.

This product is particularly suited for food processing applications such as cooking and baking release sheets with regular thermal cycling and sticky ingredients.
